

Jennie Ablog

Experienced full-stack web developer with a passion for solving problems & refining processes.

Relevant Experience

Web Developer • Jul 2023 — present

Associate Web Developer • Jul 2021 — Jul 2023

Web Development Intern • May 2021 — Jul 2021

Creating Info (Creating Next Concepts, Inc.)

- Handled different front-end and back-end technologies such as Angular, Symfony, MySQL, Nginx, and Docker
- Developed, maintained, and shipped production code for multiple Zayls projects
- Collaborated closely with key members of the team to formulate solutions for a diverse array of business problems
- Diagnosed, fixed, and documented various issues in the code base to ensure efficiency, consistency, and data integrity in the system
- Optimized web applications for performance by improving database queries
- Wrote Cypress test scripts to raise code quality and prevent regression bugs
- Learned company standards and best practices from senior developers
- Conducted code reviews and provided feedback to maintain code standards
- Provided training and mentorship for new hires

Web Developer / Volunteer • July 2020 — December 2022

U.P. Vanguard, Inc. - University Chapter

- Provided pro-bono services for the virtualization of various fundraising events during the COVID-19 pandemic
- Developed the virtual sports event platform used for six online events, primarily using Django, HTML, CSS, Bootstrap, and Heroku
- Integrated with Strava API to enhance functionality and user experience
- Implemented responsive design techniques to ensure that the website displays correctly on different devices and screen sizes
- Provided ongoing support and maintenance to ensure that the website was up-to-date and free of technical issues

5G Intern • June 2017 — July 2017

Nokia Manila Technology Center

- Participated in Agile Scrum environment
- Collaborated with a team of six interns to design and develop web solutions for the company's machine reservation system and work dashboard, using HTML, CSS, JavaScript, Ruby on Rails, Git, and Jenkins API
- Learned about the company's 4G and 5G technologies
